MOBICASE

October 26-29, 2009
Sponsored by ICST

The International Conference on Mobile Computing, Applications, and Services
www.mobicase.org

Important Dates for Posters and Demos
Demo/Poster Proposals due: August 18, 2009
Acceptance notification: September 11, 2009

General Co-Chairs
Rebecca Montanari, *University of Bologna, Italy*
Petros Zerfos, *IBM Watson Research Center, USA*

Steering Committee Chair
Imrich Chlamtac, *Create-Net*

Program Chair
Thomas Phan, *Microsoft, USA*

Industry track chair
Jatinder Pal Singh, *Deutsche Telekom R&D Labs
    and Stanford University, USA*

Workshop chair
Ben Greenstein, *Intel Research Seattle, USA*

Demonstrations/poster chair
Angela Dalton, *Johns Hopkins University, USA*

Program Committee members
Murali Annavaram, *USC*
Trevor Armstrong, *Microsoft*
Paolo Bellavista, *University of Bologna*
Nina Bhatti, *HP Labs*
Lawrence Brakmo, *Google*
Tim Brecht, *University of Waterloo*
Jerry Cheng, *Yahoo!*
Saumitra Das, *Qualcomm*
Rajit Gadh, *UCLA*
Hani Jamjoom, *IBM Watson Research Center*
Yiming Ji, *UCSB*
Minkyong Kim, *IBM Watson Research Center*
Haiyun Luo, *Azalea Networks*
April Mitchell, *HP Labs*
Trevor Pering, *Intel Research*
Nischal Piratla, *Deutsche Telekom R&D Labs*
Calicrates Policroniades, *Telenor R&D*
Karim Seada, *Nokia Research*
Timothy Sohn, *Nokia Research*
Andreas Terzis, *Johns Hopkins University*
Alexander Varshavsky, *AT&T Labs*
Pablo Vidales, *Deutsche Telekom R&D Labs*
Guang Yang, *Nokia Research*

Researchers and engineers face new challenges stemming from consumer habits that continue to shift to encompass both a desktop-centric work environment as well as a smartphone-centric lifestyle. MobiCASE, the International Conference on Mobile Computing, Applications, and Services, will be where theory meets practice in the mobile wireless computing community. The conference will allow scientists and practitioners from both academia and industry to highlight their best work in mobile applications and service provisioning.

Call For Posters

MobiCASE seeks posters from researchers in both industry and academia that describe recent and on-going work in mobile applications and service provisioning for mobile users. Posters will be presented in a special session during the conference to allow presenters to interact with conference attendees and gain feedback on their ongoing work. The poster session will be an excellent venue for highlighting early work on new and controversial mobile applications and end-to-end systems. Proposals for posters should include an extended abstract a maximum of two pages long, including all figures and references. The abstract should be formatted in two columns, single-spaced, with a font no smaller than 10-point. Submissions may include an electronic copy of the poster in addition to the abstract. Proposals may be submitted electronically by emailing the extended abstract and the poster, if included, as PDF attachments to demosposters_chair@mobicase.org. The email must include the title of the poster and the author list, including affiliations. The extended abstracts of accepted posters will be included in the conference proceedings.

Call For Demonstrations

MobiCASE seeks proposals for live demonstrations of mobile computing applications and services. We particularly encourage those demos running on mobile platforms that will allow participation by conference attendees. The demo session aims to showcase interesting research prototypes at all stages of maturity, and as such we welcome demonstrations of both published and unpublished work. The demo submission should be an extended abstract up to two pages long, including all figures and references. The abstract should include a description of the demo, the equipment to be used, any special requirements beyond a table/booth with power outlets, as well as possible interactions (interoperability or interference) with other demonstrations. We will try to accommodate reasonable requirements, however such accomodations will be limited and all demonstrations will be hosted in one large open space. Proposals may be submitted electronically by emailing the extended abstract as a PDF attachment to demosposters_chair@mobicase.org. The email must include the title of the demo and the author list, including affiliations. The extended abstracts of accepted demos will be included in the conference proceedings.
